GRANDE PRAIRIE, ALBERTA, THURSDAY, OCTOBER 12, 1933

3 cents a Copy

No. 16

All Parties Agree That if Representation Unchanged North Entitled to Extra Seat

That the Peace River is entitled to an extra seat unless the representation throughout the province is cut down, which would change the unit, is contended for by practically every one, irrespective of politics. The only difference of opinion seems to be where the boundary lines should be in carrying out the new constituency.

Hugh W. Allen, M.L.A., called by The Tribune over the phone and asked for an opinion, had the following to say:

"The population of Alberta at the last census was found to be 730,000, and with 63 members in the provincial legislature the unit of representation is approximately 11,500."

"The population of the three provincial ridings constituting what is generally known as the Peace River area, viz., Ground, Peace River and Grande Prairie, is shown as 42,000; so if the same unit of representation is adhered to in the next redistribution undoubtedly this country is entitled to an additional seat."

"My own opinion is that the number of seats might very well be cut down without doing any injustice to anyone in the way of depriving them of representation. I think the unit of representation should be raised to 14,000 or 15,000."

"If that were done, the number of seats in the Peace River would remain the same and the unit would remain to roughly equalize the population of the three constituencies."

"At present the figures for these are: Ground, 10,000; Peace River, 10,000; Grande Prairie, 12,000."

"The increase of population over the above figures of the 1921 census is not as great as some imagine. While there was a considerable influx of settlers in the next two years, there has also been a quite perceptible

Jack Taylor Accepts Brissler's Challenge

In reply to Jack Brissler's challenge in last week's issue of The Tribune, Jack Taylor makes the following statement:

"I will meet Jack Brissler in a return match in Grande Prairie some time early in November, Australian rules, twelve months."

"I feel I am handicapped by not being permitted to play seriously for my favorite club, as I have great respect for Brissler's wrestling ability."

"I am asking for the return match to be extended to not less than two hours."

"I have started to train for this match and, although I expect to win, I know this match will be one of the hardest of my career."

Interviewed by The Tribune, Jim McDonald, local referee, stated that he had received requests from a considerable number of wrestling fans to stage the return match between Taylor and Brissler in Grande Prairie at an early date.

He has started to make arrangements and expects to be able to announce the date next week.

There Will Be Much Joy Among Boys and Girls

There should be great joy among the boys and girls of Grande Prairie and district following this issue of The Tribune, for in the next few days there announces a Nyal Children's Popularity Contest, which will have its final results in the form of prizes to be counted in time for the fortunate children to receive their prizes before Christmas Day.

For the girls the prizes are: First, doll and carriage; second, doll carriage; third, eighth, inclusive, doll. The boys have a chance to win: First, prize, bicycle; second, rubber tire wagon; third, to eighth, inclusive, rubber skates.

In all sixteen valuable prizes will be given away to lucky boys or girls, and that many more will be by taking at the store.

Zurch and Lust To Meet Here on November 11th

By his win over Patsy O'Brien on Monday evening at the Wapiti Arena, Ernie Zurch will meet Rusty Lust of Medicine Hat in the main event of Frank Donald's fight card to be held in Grande Prairie on November 11th.

These boys have met twice, Lust winning the first and Zurch the second.

Donald is already making up his card and card is being laid out, and the contest will be watched.

Appointed Sub-Agent Spirit River and DeBolt

Donald Buck, timber inspector, was recently appointed sub-agent to act at Spirit River and DeBolt.

Frank permitting, Mr. Buck will be at Spirit River the last Wednesday of each month and at DeBolt the last Thursday of each month.

ANNUAL HOSPITAL DANCE WILL BE HELD OCT. 25TH

The annual hospital dance, that delightful social affair given under the auspices of the Grande Prairie Municipal Hospital Aid, will be held Wednesday evening, October 25, in the R. P. O. E. (Rike's) Hall, Grande Prairie.

Dancing is scheduled to commence at 9:30 p.m., and Patsy O'Brien's orchestra has been engaged to supply the music. The charge for admission will be fifty cents.

Creamery Again Discussed by the Board of Trade

C. W. Stilling again met the Board of Trade at a special meeting in relation to the building of a creamery here.

He stated that he was in a position to build a modern creamery, which, when finished, would cost about \$80,000, but that he was unable to do so at present.

This matter has been hanging fire for some time. It was the general opinion of those present that the creamery would mean much to the town and that it was a matter of which could be let to milk cows.

FROM HERE TO THERE "ALONG THE WAPITI"

By ARTHUR JACKSON

You are now turned in on a new broadcast from a playmate station and, though you may not be so much interested in the story as to furnish interesting reading, much effort may be unsuccessful. If that happens, do not feel compelled, for any reason whatever, to read to the end of this broadcast. When you have had enough, just turn the dial—that is, tip the magnet over—and read something else. You alone will know (unless you tell some one) that therefore nobody's feelings will be hurt.

VISITING A FRIENDLY AND BEAUTIFUL COAL FIELD

If you are from the old country, most likely you will have seen many coal mines and remember the massive tower-like structures surrounded by two enormous wheels over which heavy cables to raise and lower the monster cages that go down thousands of feet into the bowels of the earth and bring to the surface from the depths the coal mined there. Perhaps you still thrill when in memory you go back to your first descent into one of the old country pits and when the guide you felt as the cage rapidly dropped in the darkness below, you were hurried to destruction. How much safer one felt during that first descent with the friendly hand of an experienced miner on his shoulder!

But perhaps you are not acquainted with old country mining, but are familiar with mining in Pennsylvania, or Vancouver Island, or in other parts of Canada or the United States. Probably there you saw trains of dump cars running swiftly down iron tracks into the mine instead of a straight descent.

But both in the old land and on this continent, coal mines are not closed when the "boom" is in. In industry, there are scenes of action, where men of brown eagles in grimy and dangerous enterprises, the accompaniment of the drone and rattle of ponderous machines, using much power, are engaged in the character of a coal mine in operation can be heard a long way from the mine.

ever near, looms the grim spectre of violence and horrible death for hundreds of men, sorrow for women and children. How many scenes of horror have occurred in the coal mines! How much heroic action! The average coal mine at its best is a lot on the landscape; at its worst, a veritable hell. Even the coal regions themselves are hard places to live in, for starvation and poverty often lives stalk through the land and death and bullet are used in little industrial warfare.

But on a glorious fall day, last Sunday to be exact, when I went to see the one pictured. On that day I

visited a coal field beautiful and friendly, where groups of three or four men, in a coal mine, were at work. It is a great satisfaction to many of us to see a coal mine where it is good. Next winter, I will be back to see it.

In the town of the Grande Prairie district, where the coal is good. Next winter, I will be back to see it. The coal is good. Next winter, I will be back to see it.

There are other mines on the Wapiti, but I visited only two—Barnes and Campbell. Both workings are close together and go into the river bank for 150 feet or so. The short passageway in each is about six feet high and about the same depth, though the underlying levels are somewhat uneven and even a short man is inclined to stoop as he walks in the mine. The tunnels are driven into the coal and their walls reflect light from the entrance as they would if covered with patent leather. To a layman the quality of the coal appears good. In this appearance, however, do not be in for its taste at the University of Alberta laboratory. The coal is of a high quality, but it is not as good as the coal from the mines.

Probably during the coming winter, which is now rapidly approaching, when the mercury hits "—" below the high quality of the fuel will appeal and a large quantity of it in the coal will give that grand and glorious glow, but last Sunday afternoon, in the warmth of the Indian summer, coal was not so much in demand. The coal was of a high quality, but it is not as good as the coal from the mines.

There are things outdoors more bewitching than northern streams and forests in Autumn. The coal is of a high quality, but it is not as good as the coal from the mines.

As we go along, far from the industrial strife, I made the acquaintance of two friendly coal miners, who were of a high quality, but it is not as good as the coal from the mines.

Timely Hints From the Beaverledge Sub-Station

By W. D. Albright

"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

August and September rainfall ran in reverse.

Good seed oats were being harvested. Many details require attention on a farm. Neglect of them causes trouble.

Ginseng and comestor etched the lawn with their crimson tints, contrasting with the prevailing gold, lemon and orange.

Is it time to finish every land when full-ploughing a big field exposed to sweep of wind or frost? Running water?

Watch granary floors and walls for grain leakage; roofs and walls for weather leakage. Even a small leak can cause a loss of grain from such causes. The damage is not always apparent at first.

Picks of weeds trouble lurk around threshing sites. Clean up before letting stock at them. After the piles of weed seeds have been carted away and burned dig the roots right into the ground where they will rot and decay; or at least cover them deeply with straw so the animals cannot readily eat them when mowing after grain.

"Smoking is a bad habit," drawled a homesteader after a long pause. The prairie fire had almost burned up his buildings. It is a particularly bad habit around a threshing site, where the fire is not only a danger to the crops, but also a danger to the animals. The fire is not only a danger to the crops, but also a danger to the animals.

By another sign of inclemency, in some of the outlying bush areas cutting had not been completed at the end of the month. The work was repeatedly interrupted by showers of heavy rain, which had been snow north of the Peace. The mean temperature at the substation was one degree below the previous year's.

Following is a comparison of Beaverledge data with those of the previous year, a few other representative points:

Place	Precip.	Mean Temp.
Beaverledge, Alta.	1.75	49.57
Baldwin, B. C.	2.40	45.92
Drean, Alta.	1.75	42.52
Grande Prairie, Alta.	1.50	42.52
High Prairie, Alta.	2.80	45.91
Hydro, Alta.	2.27	45.80
L. M. Godfrey		

A Half-Holiday Threshing Everyone is the better for an occasional holiday. A complete cut-out from all work, and a few other, representative duties and accustomed sensations rests the nerve.

There are different ways of accomplishing it. Gunnes are good, but they are rather strenuous. The post-mortem of the fall, some men like to knock a little ball around a pasture. It must be fun for the boys. It is hunting and fishing have their merits, but they are not so much fun as a game of cards. The philosophy of nature year recollections of the pleasure of a good meal, and the pleasure of a good meal, and the pleasure of a good meal.

Civil servants are allowed a good many holidays, including Saturday afternoon. Most of them are more than all they can get, but responsible officers, however, are not so much. They have a great deal to do, and they are not so much. They have a great deal to do, and they are not so much.

On September 20 the Superintendent, through the kindness of the Superintendent, gave me a tour of the station. He showed me the station, and he showed me the station. He showed me the station, and he showed me the station.

Throughout the entire Peace Republic, the weather was not so much. The weather was not so much. The weather was not so much. The weather was not so much.

chockers that caused dust fever. But this year September had been wetting on the rocks, and besides, the dust was not so much. The dust was not so much. The dust was not so much.

The straw was loose. Legs and lungs felt the strain. They would have felt it more only for the land's effect of an unfailing "daily" routine. It seems that the work is not so much. The work is not so much.

A SPECIAL TRIBUNE FEATURE

THE BEST OF THE WEEK'S INTERESTING NEWS PICTURES

NATIONAL RESEARCH COUNCIL AWARDS RESEARCH SCHOLARSHIPS

Above are five brilliant students who have been granted scholarships by the National Research Council of Canada to proceed with research work in the Department of Physics in the University of Toronto. Left to right: Sidney Bateson, M.A., of Dalhousie University, who is entering his second year of research work as a National Research Council Fellow; A. M. Crocker, M.A., graduate of McMaster University; R. M. Dockett, M.A., of Dalhousie University, who has had two years' graduate work at his own university; R. W. McKay, M.A., a graduate of Toronto, whose scholarship has been renewed for a second year; A. C. Young, M.A., of the University of British Columbia, who also is entering his second year as a National Research scholar.

DEATH EDICT FALLS ON 2,000 BUFFALO IN ALBERTA

The buffalo herd in Watkinsburg National Park, Alberta, has increased so rapidly that the Canadian Government has sanctioned the slaughter of 2,000 of them. Above is a picture of one small group of the herd in Watkinsburg Park. The buffalo, in danger of extinction a few years ago, seem to have one ambition in life—to raise a large family—now that they are under the protection of the government.

HUNDREDS KILLED WHEN HURRICANE STRIKES MEXICO

Above map shows the area surrounding Tampico, Mexico, which sustained heavy damage when struck by a hurricane. The city of Tampico is almost completely ruined and the death toll is estimated at approximately 300. Many thousands are homeless and the number of injured citizens is reported to be very high. Reports from Mexico City state that at one period the hurricane attained a velocity of 120 miles an hour.

GREETING A HUNGRY REBEL CHIEF

President Ramon Grau of Cuba is here shown shaking hands with Juan Blas Hernandez (right), Cuba's perpetual rebel, when the latter recently visited Havana to assure Grau of his support, temporarily, because he couldn't find his rebel followers. At the left is Colonel Fulgencio Batista, commander-in-chief of the Cuban armed forces.

WHERE PRISONERS FIRED THE JAIL

State troopers are shown entering the cell corridors at Eastern Penitentiary, Philadelphia, after subduing 1,492 long-term prisoners who rioted and burned their lockers. Below is an exterior view of the prison, while in set is Herbert "Hard-Boiled" J. Smith, warden of the penitentiary, bearing the marks of his beating at the hands of the convicts. Now escaped, but several were overcome by snobs.

AGE LIMIT FOR ARCHITECTS

Any Over 55 Years Are Too Old To Compete

LONDON, Eng.—The government has decided architects more than 55 years old are too old to compete in designing the great \$10,000,000 office block to be built in Whitehall, centre of the United Kingdom administration.

This rules out such world-famous architects as Sir Edwin Lutyens, Raymond Unwin, Herbert Baker, Reginald Blomfield and Banister Fletcher. The reason given for the age limit is that building of the new block will occupy several years, and according to the government experience shows that elderly architects engaged on such big undertakings often die before the work is completed.

After seven years spent at the heart of the empire, Hugh M. Baker, late Alberta representative in London, England, has returned to Edmonton, having been recalled on the closing of the Alberta office overseas. He will continue with the inside service of the government in Edmonton.

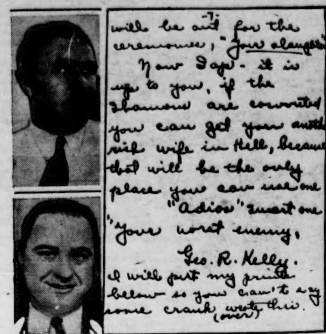

THE YELLOW PERIL

According to a dispatch from far-off Calcutta, India, a clockwork automobile, that runs 40 miles on a winding, has been introduced there by the Japanese, selling for \$600 rupees, or \$140. As far as the automotive industry in Canada is concerned, it need have no fears. The gadget invention would never be admitted to this country, on official points out, because the provincial governments have never learned how to tax clock-work.

CANADIAN-PRODUCED RADIUM

TORONTO, Ont.—The second shipment of Canadian-produced radium, consisting of 25 needles, each two milligrams, was delivered to the Ontario government for use in provincial hospitals.

The Dominion Bureau of Statistics estimates that 246,000 Canadians have been retrained in employment since April 1. In the month of August, 12,000 left the army of the unemployed for gainful occupation.

THE SINISTER NOTE IN THE BAILEY TRIAL

Here is part of the letter sent to Charles Utrach (top) oil millionaire, for whose kidnapping Harvey Bailey and several alleged accomplices are on trial at Oklahoma City, by George "Machine Gun" Kelly (lower), "pal" of Bailey. The letter threatened to wipe out the Utrach family and Kelly added his fingerprints to prove the letter was not from a crank.

GIVEN BIG VOTE IN ALL-STAR LINE-UP

Here are the outstanding three major league baseball players of the year, on the basis of final returns in the all-star poll. Manager Joe Cronin (right) of the Washington Senators, heads the list with 88 votes out of 88 for the short stop position. Carl Hubbell (left), of New York Giants, received 84 votes for No. 1, pitching position, and "Chuck" Klein (left) of Philadelphia won 81 votes for the post of duty in the right field.

FIRST FAN DREAMS OF SERIES

Pleasant dreams are being enjoyed by Art Felch, unemployed upholsterer, who is shown soundly asleep outside the bleachers at the New York Polo Grounds, the first man in the line for the World Series, eleven days before the first game. He is a nephew of "Happy" Felch, former star of the Chicago White Sox.

"Officer, where do I go to apologize for shooting my husband?"
—Everybody's Weekly, London.

PROMINENT SPORTSMAN INJURED

Geo. M. Hendrie of Hamilton, former president of the Canadian Hunting Association, who was seriously injured when his automobile left the highway near Oakville, Ontario, and crashed into a tree.

ANNIVERSARY SERVICE FORBES CHURCH, OCT. 22

Members and friends of Forbes Presbyterian Church are looking forward to the 25th anniversary service which will be held Sunday, October 22. The preparations being made are inspiring and profitable. Every body cordially invited.

ALTA. EXHIBITS FOR BIG SHOWS
With Alberta's remarkable record of victories at the Regina world grain congress still fresh in mind, the province is preparing for its annual exhibit at the royal winter fair at Toronto and the international fair and grain show at Chicago, where for the past six or eight years notable victories have also been won. Assistance will be given to exhibitors by the provincial department of agriculture but owing to economy measures the extent of this will be somewhat curtailed over former years.

Selection of live stock exhibits for the Toronto Bazaar, is now being made by the board appointed for the purpose by the government. It will include a number of exhibits of stags specially finished for the show, a carload of purebred Herefords and a carload of purebred Shorthorns, two or three carloads of Holsteins, two or three head of Ayrshires, and a carload of horses. In addition to the stock selected by the board, which will be exhibited by individual exhibitors at the fair, there will be more stags and other live stock. On the exhibits selected by the provincial board, the government pays 75 per cent and the exhibitor 25 per cent of the freight to Toronto.

Last winter at Toronto, Alberta made a remarkable showing in both live stock and grain, taking 251 prizes of which 100 were in live stock, and the balance in grain. There were 14 championships and 11 reserve championships. At Chicago this year, there will be good representation for various seed growers of the province. Last year Alberta took 18 prizes at Chicago, including three championships.

Assistance to seed grain exhibitors at the royal winter fair at Toronto will be paid on approved exhibits in registered or certified seed classes, and for junior farm club exhibits. Returns shipping costs will not be paid. Entry fees will be paid first by the exhibitors and refunded by the department on production of receipt. No assistance will be given to exhibitors in the regular open classes. For seed grain exhibitors at Chicago, the department will reimburse costs to and from Chicago on approved exhibits. Prize money won in the regular classes will be duplicated. Exhibitors winning one or more first prizes or championships will be paid a special honorarium of \$50 in addition to duplication of prize money.

Honorarium will be increased to \$100 for championship in either wheat, oats or barley. As far as possible the department will give supervision in the handling and displaying of grain exhibits at both exhibitions.

PROVINCIAL LIVE STOCK CONTEST ON NOVEMBER 18
The annual provincial live stock club contest to decide upon the Junior club teams to represent the province in the nation-wide judging contests at Toronto and Chicago will be held at Edmonton, November 18. Teams will compete from Lethbridge to the south to as far north as Spirit River in the Peace River district.

Gleanings of Interest To the Women Folks

By THE TRIBUNE'S SPECIAL SOCIETY REPORTER

G. P. W. A. MEMBERS ENJOY MEETING AT BAKA
Mrs. Turner of Sexsmith very kindly invited Grand Prairie's W. A. members to the home of Mrs. W. A. Turner, Wednesday, October 4. Four carloads went, and thoroughly enjoyed the pleasant drive, some a fine day. After a meeting, crunched with biscuits, Mrs. Turner and her sister, Mrs. Larose, served a very delicious tea.

There were eighteen members present, and two welcome guests—Miss Stewart and Mrs. Larose.

While on the subject of the W. A.'s activities, don't forget that all contributions—and any customer!—will be gratefully received at their rummage sale on Saturday next.

PURSE PRESENTED TO MISS STEVENSON
The last Ladies' Day on Thursday was held at the Golf Club on Thursday, October 5. There were forty-three members present—twice the usual number.

A purse was presented to Miss Stevenson, who expects to leave soon for Edmonton, where she will spend the winter. All are sincerely hoping Miss Stevenson will return here next year.

WINE LOVELY SERVICE
BON-BON DINN
Mr. and Mrs. C. C. Pawett had three tables of bridge on Saturday night.

After a very enjoyable evening Mrs. Gomer and Mr. Pawett will give the price, a lovely silver bon-bon dish.

GUEST RETURNS TO EDMONTON
Mrs. Pickard's guest, Mrs. Oliver Pickard, returned to Edmonton on Tuesday's train.

A.Y.P.A. HAVE NEW DRAMATIC ADVISORY BOARD
The A.Y.P.A. had their first business meeting on Wednesday, October 4. They have a new advisory board, and in the A.Y.P.A. have a new drama, even if only 75 cents, comes more expensive than washed wool to serge, there is so much water in the former.

WOMEN'S MUSICAL CLUB
HOME OF THE FOLK
The Women's Musical Club had a very delightful time at the home of Mrs. K. M. Walden last night. The hostess served delicious refreshments.

Have You Made Your Own Comforter Yet?
You should, while wool is cheap. A four-quilted comforter and a good coverlet is as warm as two five-quilted blankets, very much lighter, and very much cheaper.

But take one word of advice—buy woolen goods while wool is cheap. Wool is now at a low price, even if only 75 cents, comes more expensive than washed wool to serge, there is so much water in the former.

HOPE TO HAVE FINE BOOTH AT BAKA
The Girls' Guild held their first meeting of the year on Monday, October 2, at the home of Mrs. W. A. Turner. They have bright hopes of a very attractive stall of their own at the B.A. bazaar on November 4.

SHOULD READ BOOK TO APPRECIATE PLAY
Those of you who saw "Grand Hotel" at the Capitol Theatre last week should read the book to fully appreciate the play.

Miss Cave-Browne, who has opened a library at the old La Rose place near Spirit River's Bakery, has been asked to read the book to the "Grand Hotel."

We hope Miss Brown will get the book to the "Grand Hotel" as we have heard it is a much finer story than "Grand Hotel."

The latest "Vox Pop" is "Pleasant, Mr. Donald, may we have 'Cavalcade' soon?"

HOUSEHOLD HINTS
Delicious Mallow and Ginger Preserve

Here is a timely recipe for the making of a delicious mallow and ginger preserve:

Cut this kind of mallow and take out seeds then cut in cubes. To each pound of fruit measure 3/4 pound of sugar and 1/2 cup of water and 2 lemons and 2 ounces ginger root. Boil syrup about 15 minutes, add the thinly sliced mallow and the ginger. Then add the mallow and cook until tender. This amount makes about eight quarts.

Have You Made Your Own Comforter Yet?
You should, while wool is cheap. A four-quilted comforter and a good coverlet is as warm as two five-quilted blankets, very much lighter, and very much cheaper.

But take one word of advice—buy woolen goods while wool is cheap. Wool is now at a low price, even if only 75 cents, comes more expensive than washed wool to serge, there is so much water in the former.

"QUALITY AND LOW PRICES"

Grande Prairie TWO STORES—Sixmonth

Ladies' Day at the clubhouse on Richmond Hill Golf Course was well attended, over fifty being in attendance. Success of the day was due in no small measure to the untiring efforts of Mesdames W. C. Pratt, Daley and A. Christie.

Miss Gertrude Graham is now the proud possessor of the J. Kerr Challenge Button, defeating Miss Lena Ward in a close match.

Miss Emily Watson, in her game with Miss Ethel Bjerke, turned in a net card of 50, winning the game to be into the hour of the ladies' tournament. Another game has to be played to fill the bottom 4th bracket. Mrs. C. C. Fleming is out in the final bracket on the top half.

All the men's tournament are now past history until another year rolls around.

Francis Donald, in his game against Dungan to see who would play in the four took the latter right to the last hole, being all square on the 17th. Francis took a 6 and Dungan a 9 on the 18th.

Larry Cobb put up a good match in the four, but lost 3 and 2.

In the final game of the men's club championship tournament, between A. R. McMillan and Geo. Dungan, the former won at the 18th hole, 6 and 5. Mac played par golf, but George was not himself on the greens. The score:

First Round
McMillan.....4 5 4 5 5 5 4 5 4 4
Dungan.....4 5 4 5 5 5 6 4 6

Second Round
McMillan.....4 4 5 4 5 5 5 6 4 4
Dungan.....5 5 3 5 4 4 5 5 7 4 3

Third Round
McMillan.....5 7 3 4 5 5 5 7 4 3
Dungan.....6 5 3 4 4 5 5 5 7 4 3

Fourth Round
McMillan.....5 5 4 4
Dungan.....5 5 4 4 5

GOLFERS HEAR RESUME OF SEASON'S ACTIVITIES (Continued from Page One)

match and handicap committee, read the financial report. It showed a nice balance. The amount had been turned over to the club.

In the absence of A. E. Galway, chairman of the membership committee, Mr. Torg reported on behalf of that committee. He pointed out that the membership stood at 132, as against 112 last year. The credit for this increase, he said, was due to the chairman.

Previous procedure was followed and Messrs. Pickard and Nelson were appointed.

pointed a committee to name the nine governors, who are as follows: A. R. McMillan, C. C. Fleming, R. Knapp, R. H. Webster, D. W. Pratt, T. M. Lowe, J. W. Pickard, and O. P. Nelson.

The governors will meet shortly and elect the officers and appoint the various committees.

President Simpson, who declined nomination after being pressed to continue in office, refused to stand. He said that his action should not be construed to mean that he was losing interest in the club.

A hearty vote of thanks was tendered Mr. Simpson for the valuable work he had done for the club since its inception.

A voice of thanks was also tendered Mr. Carter for auditing the books and deciding the best of it. In the second Thompson, evidently acting on instructions from his second, Bill Swanson, came out of his corner and quickly closed with his opponent.

The fight was both comical and fierce, with Les Coulter of Rennox and Les Danham of Beaman in the semi-final in a scheduled eight-round affair.

"Neither" lost much time in the first round and swapped punches. The round was about even.

Danham missed many swings which seemed to have enough steam behind them to put an ox to sleep. Coulter came out of his corner and went right after him. He was the winner of the fight by a decision of the judges.

Notes of the Evening
The attendance comfortably filled the arena.

The "Denver Kid" challenged any of the Peace River to fight at 130 pounds.

Jack Penney's Orchestra furnished the music much to the satisfaction of everyone.

Robt. Robinson made a most efficient timekeeper.

FIGHTING DISEASE IN DOGS AND FOXES
Disease on fox and mink ranches has caused severe losses in recent years. Researches by the Dominion Research Institute of the Dominion Department of Agriculture at Hull, P. Q., have established the fact that the principal danger among the animals is caused by a disease known as canine distemper virus. Arctid dogs are affected with apparently similar disease, which is also included in the Institute's investigations.

Very strange outbreaks from fox and mink ranches are under study together with canine distemper virus. For this purpose a large number of compound-fed animals, particularly foxes, dogs and chicks, or ferrets, are required, and these are bred and raised at the Institute. Extensive experiments and trials are in progress, with the object of developing vaccine and serum for protective treatment and immunization.

BONE AND WHALE BONE MEAL
Bone meal or flour contains 15 to 25 per cent of phosphoric acid and 2 to 3 per cent of silica. It is the result of grinding the raw bone. The phosphoric acid, although not immediately available, is by reason of the decomposition of the bone in the soil, liberally and gradually, by the action of crops. Bone meal is frequently used as a "feeding" manure from the fact that its decomposition is necessarily slow. It gives its best results to soils which are warm, moist and rather well aerated. Whale bone meal, a by-product of the whaling industry, is used as a fertilizer and also contains 25 per cent phosphoric acid and 2 per cent silica. Whale meal, however, another by-product composed of small scraps of whale meat and bone, contains 6 per cent nitrogen and 5 per cent phosphoric acid.—Dominion Chemist.

The installation and operation in Ontario of two plants for the extraction of oil from soy beans has increased the supply of a valuable domesticated protein concentrate in feeding stuffs.

The number of registrations of fertilizers accepted under the Fertilizers Act during the year ending June 30, 1932, was the annual report of the Dominion Minister of Agriculture, was 331 as against 410 in the previous year.

T. WILSON
Conductor of the Grande Prairie Symphony Orchestra and Grande Prairie Town Band. The orchestra will give its first concert of the season in the Capitol Theatre on Sunday evening next, commencing at 8 o'clock. Mr. Wilson is proprietor of the Regal Confectionery.

ZURCH SHADES PATSY OBRIEN IN A GRUELLING CONTEST (Continued from Page One)

Creek and Ed. Green of Grande Prairie served up an article much to the liking of the Kid. Although he gave away 24 points, the Kid put up a wonderful battle. In the first round, Green went to the mat again and claimed a foul. The usual five minutes was allowed.

In the second round both went down and this time the Kid claimed a foul and five minutes were allowed.

In the fourth both clugged and at the end of the round Green landed hard to the jaw and the Kid was out. Jack Parker, who recently arrived in Grande Prairie, sprung the surprise of the evening when he knocked out Zurch Swanson in the first round. Parker substituted for "Speed" Fraser of Dawson Creek, who was unable to be present on account of a broken nose.

It looked as though Don Butler would win handsily over Kid Thompson after the first round, during which he landed the best of it. In the second Thompson, evidently acting on instructions from his second, Bill Swanson, came out of his corner and quickly closed with his opponent.

The fight was both comical and fierce, with Les Coulter of Rennox and Les Danham of Beaman in the semi-final in a scheduled eight-round affair.

"Neither" lost much time in the first round and swapped punches. The round was about even.

Danham missed many swings which seemed to have enough steam behind them to put an ox to sleep. Coulter came out of his corner and went right after him. He was the winner of the fight by a decision of the judges.

The number of registrations of fertilizers accepted under the Fertilizers Act during the year ending June 30, 1932, was the annual report of the Dominion Minister of Agriculture, was 331 as against 410 in the previous year.

INFLUENCE OF LIME ON SOIL TEXTURE

The influence of lime and its compounds upon the texture of soils is the soil is most marked in the case of clays, which it renders less sticky and when wet, and more friable and mellow when dry. On light soils—sandy and gravelly loams—lime and carbonate of lime exert a beneficial influence, their action being to cement slightly the soil particles, rendering the soils somewhat heavier and more impervious to water, and, consequently, to dry out in seasons of drought. Dominion Dept. of Agriculture.

FARM LABOR AND WAGES

The average wages paid to farm helpers in Canada for the year 1932 again showed a considerable decrease as compared with the previous year. The cost of farm labor reached its highest point in 1920. In the next two years there was a rapid drop, so that the average of yearly wages, including board for male help in 1932 was nearly 28 per cent less than in 1920. From 1920 to 1929 no very wide fluctuations occurred. In 1930, 1931, and 1932 continued marked reductions were registered in the average value of yearly wages and board, producing the downward trend of the prices of farm produce.

MARKED EGG CONTAINERS

For selling eggs below grade stated in contravention of Clause 3 (a) of the Egg Regulations, a wholesale firm in Regina was fined \$100. Under the new Clause 3 (a) states: "No wholesaler shall ship eggs, or cause eggs to be shipped, transported, or delivered, or have eggs on his warehouse floor ready for sale, unless the eggs and the grade of the eggs contained therein in accordance with the class and the grade of the eggs, and also with the name of the country of origin when other than domestic product."

CANADIAN CIDER

The best brands of cider are made from apples high in tannin. Most commercial varieties of Canadian apples are low in tannin except Ribblesdale, Roxbury Russet, and Golden Russet varieties, which produce satisfactory cider. Researches by the Dominion Division of Horticulture, the experts of the Dominion Department of Agriculture, in 1931, increased to 25,924 gallons in 1931, increased to about 50,000 gallons in 1932.

THE ANTIQUITY OF CORN

Where or when corn was first cultivated, or from what wild plant it was derived, is not definitely known. It is generally assumed that its cultivation started in Central America and spread north and south. It has never been found wild. The locus of Peru is said to have had large stores of corn for it to prevent famine in case of crop failure. It was grown as far north as St. Lawrence Valley when the first explorers arrived there. When Columbus landed in the West Indies he was presented with a kind of bread made from a grain the natives called "Maize." From this word is derived the English word maize, under which name the plant is known in Europe.

ROUGHAGES FOR EWES

A study of home-grown roughages for breeding ewes is under way at the Animal Husbandry Division, Experimental Farm, Ottawa. The results of three years show that sheep fed timothy hay alone can barely maintain themselves, and their milk yield is practically nil. Not only were the lambs weak and undernourished at birth, but at two months of age those surviving 22 per cent lighter than those from ewes fed alfalfa. The condition of ewes and lambs on mixed grass hay was a little better than those on the timothy-fed lot.

FERTILIZING TOBACCO

In tobacco fertilizing tests at the Dominion Experimental Station at Parham, Que. bog and meadow gave the highest yields and grade index, followed by horse, hen and sheep manure. It was found that 10 to 15 tons of manure with 700 to 1,500 pounds of 56-1 (nitrogen, phosphoric acid, and potash respectively) fertilizers are the most economical means to obtain maximum yield and quality in cigar tobacco. Heavy applications of manure, 20 tons to 250 pounds of superphosphate, gave a yield and quality quite superior to 20 tons of manure alone. Superphosphate alone proved to be the best source of phosphoric acid. The best source of potash was the sulphate form.

An inquiry for the purchase of apples has been received from Valparaíso in the Island of Mexico, for fork and manure-fork ash handles from Bristol, England.

There are five Portland cement factories in Argentina.

Branded best sold during the month of August in Canada totalled 2,900, 240 pounds.

Canadian sewing machines have counted Canadian wheat flour as the chief Canadian export to Brazil.

Northern Ireland provides a market for the surplus fibre sown grown by the Dominion Division of Economic Fibre production.

As a source of supply to Greece, Cyprus, improved tree positions in the first six months of this year from 15th to 10th place. In wheat, Canada moved from 3rd to 2nd place, the Argentine being the chief supplier of wheat.

A new package for apples consisting of a corrugated paper carton holding a dozen apples has been devised by the Dominion Experimental Station, at Fredericton, N.B. The package is covered with cellophane, exposing every apple to view.

The NYAL Children's Popularity Contest

Continuing Till Saturday, December 23rd

We are going to give these prizes to sixteen youngsters receiving the largest number of votes in the Great Nyal Children's Popularity Contest.

Prizes for Girls

First Prize:
DOLL AND CARRIAGE
Value \$25.00

Second Prize:
DOLL CARRIAGE
Value \$5.50

Third to Eighth Prizes:
DOLL
Value \$2.00

Prizes for Boys

First Prize:
BICYCLE
Value \$29.75

Second Prize:
RUBBER-TIRED WAGON
Value \$8.50

Third to Eighth Prizes:
ROLLER SKATES
Value \$2.50

Follow These Rules to Win Nyal Children's Popularity Contest Prizes

1 Contest is open to all Boys and Girls, 15 years old or younger.

2 No votes will be accepted before the first day of Contest or after 12 o'clock midnight, on last day of Contest.

3 Any slip of paper properly signed by the proprietor or his clerks, designating number of votes, will be official.

4 Votes to be given and to be placed in Ballot Box only at time of sale.

5 No votes to be solicited in store.

6 Each contestant must be registered with the proprietor of store and will receive 1000 votes for registration. Only one registration per contestant.

7 One Penny's purchase of Regular Merchandise gives one vote. One Penny's purchase of NYAL Merchandise gives TWO votes.

We Will Be Glad to Explain Further Details of This Contest

Purchases in the Nyal Two-For-One Sale, now in progress, apply on this contest. Prizes will be on display in windows about November 1. For further information call at store.
